

c. Prices Indices of Input in Residential Building**Table 3.2 .- Price Index of Input in Residential Building-
Various Base Periods,
as of January 1956**

Year	Annual average	Month											
		I	II	III	IV	V	VI	VII	VIII	IX	X	XI	XII
Base: July 1950 = 100.0													
1956	451.7	427.2	427.4	444.9	444.9	450.1	459.4	460.4	461.1	461.1	461.1	461.1	461.1
1957	474.2	468.9	468.9	468.9	468.9	468.9	468.7	477.2	477.4	477.9	481.7	481.5	481.1
1958	479.4	480.6	479.5	479.5	481.1	478.5	475.6	482.9	481.5	480.1	478.8	478.4	476.3
1959	484.8	475.4	479.3	481.0	484.1	483.4	482.9	484.6	487.9	488.0	489.3	490.0	491.4
1960	510.9	491.1	491.1	502.0	503.8	503.1	513.5	521.0	520.9	521.4	520.8	521.3	521.3
1961	557.0	521.5	538.8	540.7	550.4	550.8	554.3	565.3	568.1	571.4	572.2	574.7	575.3
1962	627.2	576.2	599.7	618.0	618.6	617.9	618.3	627.9	650.4	650.3	650.3	649.6	649.0
1963	660.8	655.3	662.7	659.7	660.1	660.1	660.6	662.1	662.1	661.2	661.2	662.5	661.9
1964		668.0											
Base: January 1964 = 100.0; Chaining Coefficient = 6.680													
1964	103.9	100.0	100.3	100.4	100.7	100.7	102.8	108.1	108.2	105.5	105.9	107.2	107.5
1965	111.5	107.9	108.4	109.1	110.0	110.3	112.4	114.6	115.4	115.1	111.2	111.6	111.6
1966	120.5	113.3	117.6	119.1	119.5	119.6	122.4	125.0	125.2	123.0	120.6	120.6	120.5

- (1) In order to chain the updated indices with the previous base period they should be multiplied by the respective chaining coefficients.
- (2) On IV 1975 and on X 1983 the base index was changed (due to the updating of the "basket"). These months were also the base period of the updated indices. The average annual index for each of these years was chained to previous base periods by means of multiplying the new base indices by the respective chaining coefficients.
