FAX. 02-6521340

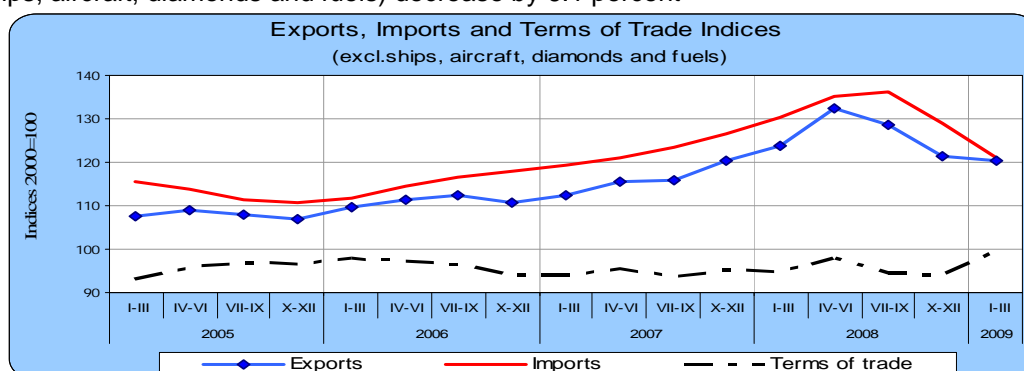

Jerusalem,
June 29, 2009
132/2009

Previous Press Release on Foreign Trade Price Indices appeared on March 26, 2009

Foreign Trade Price Indices in First Quarter 2009

In the first quarter 2009

- The terms of trade index (excluding ships, aircraft diamonds and fuels) rose by 5.8 percent
- Export prices (excluding aircraft and diamonds) decrease by 0.7 percent and import prices (excluding ships, aircraft, diamonds and fuels) decrease by 6.1 percent

This information was provided by the Central Bureau of Statistics, based on preliminary data on goods that passed through Customs. Data do not include trade between Israel and the Palestinian Authority. Imports are valued c.i.f., and exports are valued f.o.b.

The terms of trade index is calculated as the ratio of the total export price index to the total import price index.

Export Prices

Export prices continue to decrease in the first quarter of 2009, its third consecutive quarterly decrease.

Price indices of **manufacturing exports** (excluding diamonds) fell 1.3% in January-March 2009, continuing a 5.5% decrease in the last quarter of 2008. Price indices of **agricultural exports** rose by 16.0% in the first quarter of 2009.

Breakdown of Price Indices of Manufacturing Exports, by Technological Intensity

Written by Helen Brusilovsky

For explanations and clarifications regarding the contents of this Press Release,
Please contact the Press Relations Unit, at 02-652 7845, 050-623 5124

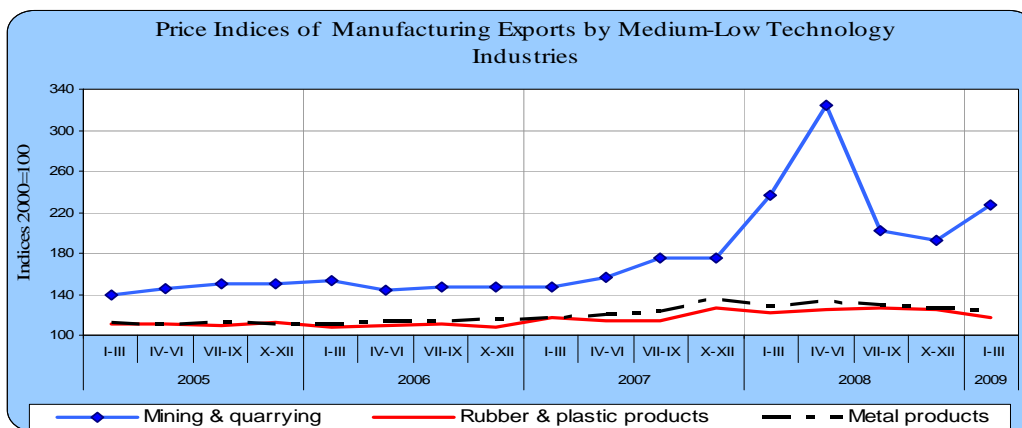

Price indices of manufacturing exports in high technology industries rose by 1.4% in January-March 2009, continuing a rise of 0.2% in October-December 2008. Detailed data by industries reveal an increase in price indices in **exports of electronic components** (9.2%), as well as in the price index of exports of **Pharmaceutical products** (6.7%).

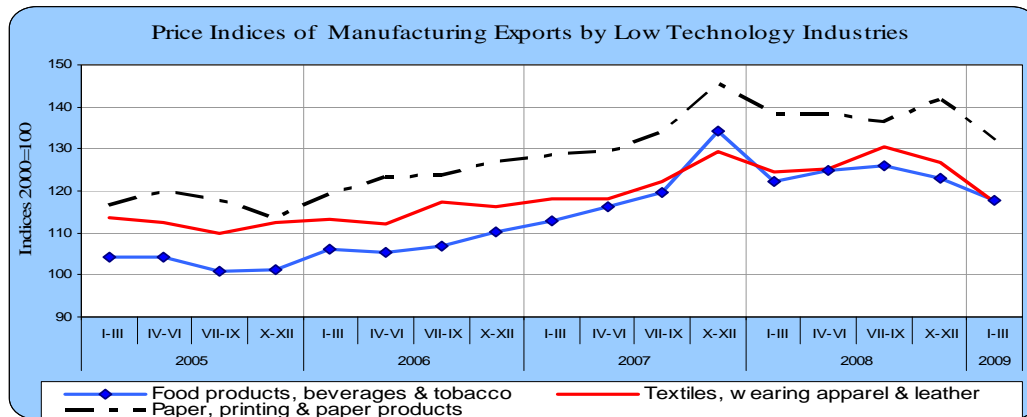

Price indices of manufacturing exports in medium-high technology industries fell by 6.0% in January-March 2009, continuing a decrease of 15.2% in last quarter of 2008. Detailed data by **industries** indicate that price indices decreased in **exports of chemicals and refined petroleum, excluding pharmaceuticals**, (-8.8%), and in **exports of transport equipment** (21.8%).

Price indices of manufacturing exports in medium-low technology industries rose by 0.6% in the first quarter of 2009, after a fall of 4.7% in the last quarter of 2008. Detailed data by **industries** indicate that price indices increased in **exports of iron and steel foundries** (21.3%) and in price of **mining and quarrying exports** (17.1%).

The **price indices of manufacturing exports in low technology industries** fall by 5.4% in January-March 2009, continuing a decrease of 2.0% in last quarter of 2008. Detailed data by **industries** indicate that price indices decreased in **exports of paper and printing products** (-7.0%), and in **exports of textiles, wearing apparel and leather** (7.3%).

Import Prices

Import prices continue to decrease in the first quarter of 2009, after a fall of 14.4% in the last quarter of 2008.

Breakdown of Price Indices of Imports, by Economic Use

Price indices of Production Inputs (excluding fuels) fall by 9.9% in January-March 2009. Detailed data by **commodity Groups** indicate that price indices decreased in most of the categories, in **imports of inputs for agriculture** (-29.6%), in **imports of Iron and steel** (-22.1%), and in price of **non-ferrous metals imports** (-21.6%).

Price indices of Consumer goods fall by 3.7% in January-March 2009. Detailed data by **commodity Groups** indicate that price indices decreased in **imports of non-durable goods** (-6.1%), and in import price of **durable goods** rose by 0.2%.

Price indices of Investment goods remain stable in January-March 2009. Detailed data by **commodity Groups** indicate that price indices of **imports of machinery and equipment** fall by 1.7% and in import price of **transport equipment** rose by 2.5%.

Price indices of Fuels continue to fall in January-March 2009 (-21.9%)

Next Press Release on Foreign Trade Price Indices will appear on September 30, 2009.

Explanatory notes

Price indices are intended to measure the change, which occurred in the average price of total imports, total exports, or a group of commodities, between two periods.

- **Price index** (unit value) is calculated with weights of the current period according to Paasche formula.
- **Volume index** is derived as the quotient of the value and of the Paasche price indices.
- **Terms of Trade index** are calculated according to Paasche price index.

Price of a single commodity (price unit value) is determined according to the average unit value of the commodity, either exported or imported.

The definition of commodities is based on the classification used for Customs tariffs (imports) and on the "Classification of Exports Commodities" (see chap. "Classification of Commodities"). The classifications do not always specify single items of uniform quality, but also groups of similar commodities. As a result, in some cases, the obtained changes in price of a commodity, as defined in the classification, reflect also quality differences of various components of the group (commodity). In some cases, price indices of similar commodities, published abroad, are used as a substitute for the average unit value.

The information used to estimate price indices of foreign trade encompasses about 50 percent of the total import or export value.

Once a year, the index commodities basket is updated and determined according to the preceding year commodities basket. Price indices are calculated in relationship to data of the preceding year and are chained to the annual average, which is presented in the tables.

- Beginning Quarter 2/2003, indices are chained and presented on the base of 2000.
- Beginning Quarter 2/1998, indices are chained and presented on the base of 1995.

Please note:

- To calculate a continuous series based on 1991, the requested index must be multiplied by the 1995 index based on 1991.
- To calculate a continuous series based on 1995, the requested index must be multiplied by the 2000 index based on 1995.

Formula

Indices are calculated according to the Fisher formula, which is the geometrical mean of the indices calculated according to the Laspeyres and Paasche formulas:

$$I_p^F = [I_p^L * I_p^P]^{1/2} = \left[\frac{\sum(p_1 q_0)}{\sum(p_0 q_0)} * \frac{\sum(p_1 q_1)}{\sum(p_0 q_1)} \right]^{1/2}$$

Where:

- I_p^F - Price index according to the Fisher formula
- I_p^L - Price index according to the Laspeyres formula
- I_p^P - Price index according to the Paasche formula
- p_1 - Price in the current period
- p_0 - Price in the base period
- q_1 - Quantity in the current period
- q_0 - Quantity in the base period

Price indices calculated according to Laspeyres and Paasche formulas do differ due to the method of quantitative weighting in calculation of the average. According to Paasche formula, weights are for the current period, i.e., the surveyed quarter year. Hence, the changes obtained in this index reflect also the changes in weights. Consequently, the index tends to diminish the price changes. According to Laspeyres formula, quantitative weighting is made according to weights of the base year. Consequently, the index is not influenced by changes in weights between the surveyed quarter years and hence, the index tends to be generally higher than the index according to the Paasche formula. The 'ideal' index according to the Fisher formula is a geometric average of the two above said indices.

The volume index of foreign trade is also calculated according to Fisher formula:

$$I_q^F = V_I / I_p^F$$

Where:

I_q^F - Volume index according to the Fisher formula

V_I - Value index

I_p^F - Price index according to the Fisher formula

The indices of prices and volume of imports are published also according to economic use and S.I.T.C. whereas export indices - according to groups of economic branches, S.I.T.C. and by technological intensity.

Current data are revised continuously throughout the current reporting year. The data of a specific year are not amended currently during that year but at the end of the year, that is in the 4th Quarterly, which includes information on all the current year.

(1) According to OECD/ 1997 classification, excl: Group 23 "Petroleum & its products" is included in "Chemical & refining petroleum" in "Medium-high technology Industries".
 (2) Volume indices not seasonally adjusted

(1) לפי סיווג OECD/1997 למעט: ענף 23 - "נפט ומוצריו" סווג ביחד עם "כימיקלים וזיקוק נפט" בתעשיות "טכנולוגיה מעורבת עילית".
 (2) מדדי נפח ללא ניכוי עונתיות

Table I 1. - Price Indices of Imports,
by S.I.T.C. Rev IV
Section (Fisher's Formula)

לוח ט 1. - מדדי המחיר של היבוא,
